ONA PULLER TOOL FOR MOEN 1200/1225 SINGLE HANDLE CARTRIDGES #11304

The premier Moen valve cartridge extractor. Unlike the standard t-handle extractor, there is no physical force needed to extract the cartridges. Using a simple threaded rod, sleeve, and crank system, you can remove Moen 1200 & 1225 cartridges with ease. If the common issue occurs where only the core of the cartridge comes out on the first try, this tool can be converted and the crank itself can turn into the expander tube to remove the brass sleeve from the valve body.

- Hardened and coated with black oxide
- Clam shell packaging for easy storage
- Clear detailed directions in packaging
- **Made in the USA**
