CIRCUIT ANALYZER #91131

Test any GFCI outlet, standard outlet, or extension cord. This unit plugs into any standard 120-Volt outlet and indicates the wiring condition of the outlet. The device can test any outlet protected by a ground fault receptacle to ensure proper interruption operation. With charts on both sides of the unit, any user can quickly identify which of the six wiring conditions is indicated by the integrated neon lamps. pg. 10-60

TESTS FOR 7 CONDITIONS: ground fault interruption, open ground, open neutral, open hot, hot/ground reverse, hot/neutral reverse and correct wiring

- Compact and easy to use
- Tester trips between 6-9 mA
- Succession of yellow and red lights provide indication of circuit status or specifies wiring errors
